Subject: Cedar Springs/ Nephi Sandstone - M23-59

m/023/059

I talked to Bruce Evans Of Nephi Sandstone today and asked him why he had not submitted his completed plan for the Cedar Springs project. He stated that he needed to get out to the site to generate some better maps based on survey control points and the weather was not cooperating yet. I told him to write us a letter describing his intentions and when he would be completing the work needed to get his plan review back to us.
